Hello on the Wire:

Hope all that were in Alabama this past weekend
made it home in fine shape. Hated to leave the
peaceful surroundings and gracious hospitality.

Hopefully the following will indicate the sincerity
of appreciation of the week end activities with the
following:

A "Hillbilly" Rendition

"The Good O Boys Roundup"

Gallant, Alabama

Words cannot describe the serenity, mingled with the
aroma of pine and the echo of a whip-poor-will
serenading three tired travelers to sleep in the wee
hours! Precognition of the next three days would
hardly let the thought process unwind and no one,
unless they had the privilege of attendance could
describe the epitome of hospitality furnished by the
Gadsden Minute Men.

"Roots" are the personification of characterization and
"Grandpa and Grandma Randall" provided the nucleus of
Americanism to their offspring, permeating the valleys
and hills of Alabama. The industriousness, mingled
with stewardship was visible in every aspect of the
three generations of the "Randall Families".

The planning, the correlation of this event was a work of
art that would be envious of any governmental or corporate
strategist. The events emerged methodically, interwoven
with meticulous timing; Security, safety, personal comfort,
education, motivation, training, musical and vocal enter-
tainment, providing the many participants, young (three
cornered pants) to my age, three days of association, (as
J.J. would say) that would "go down in the annals of
Alabama History"!

A special note of appreciation to the "Security Personnel"

that were unseen during the nighttime hours, while guests were able to enjoy the evening association around the many campfires and the restful slumber that only comes from knowing that nothing would disturb their activity.

Alabama hospitality was enhanced so graciously by the Refreshment Contingency "The Randall Women", with providing an endless supply of soft drinks with an abundance of ice and a dinner that only taste the best in the outdoor surroundings. It is my contention that if it wasn't for the "Kitchen Militia" that this country would have ceased to exist long ago. Women provide the incentive, the glue that ties the family unit together, providing the barrier against all invasion, whether active, pro-active or be it problematical. The Universal Creator damn well knew that man alone would never make it by himself!! This could be readily seen in the Saintly Twinkle of Grand-ma-me Randalls' eyes! Everyone should make available (time) to the Grandsons and Granddaughters, the exquisiteness, of interpersonal relationship, knowledge, humor, and most of all the boundless love and commitment that no one else other than Grandparents can provide! It will give the future generations the necessary ingredients to survive.

A special thank you to "Mike Kemp" the Master of Ceremonies for the presentation of the events. His insights to the now "Famous Cop-Watch Program" that is creating terror to the Terrorists. Hopefully everyone when returning to their respective communities will implement this program that has become so effective in combating malicious entry, pros-

ecution, and unwarrantless confiscation. The assimilation of information and assiduously applied can readily create disenfranchisement within the infrastructure of Governmental Organized Terrorism! A word of caution, this program is not for the timid, as had the privilege of witnessing the implementation on a Chief of Police in the little town of Sulphur Springs. The Officer had a complete come apart and screamed and made accusations, shooting himself in the foot?? (no, he shot it off) the tape was hand delivered to an attorney's office for evidentiary proof later that afternoon as I am sure that malicious harassment will continue against this family until a criminal complaint is documented and implemented?! Michael Kuriatnyk, Martin Lindstedt and myself wish to extend our appreciation for the valuable lessons learned. The Kuriatnyk Family are in the process of purchasing a Video Camera and Wireless Microphone, to complete their arsenal of Heavy Weaponry of mass destruction to the Government Sponsored Terrorists. The Kuriatnyks' already have 35 millimeter hardware which is the favorite weaponry of Jeff Randal against the infamous Sons of Satan i.e. BATF, FBI, and other agencies of pernicious characteristics.

Special appreciation and recognition is extended to a "Unique Legal Eagle" who flew in from California to share her involvement against the malicious prosecution of two Militia Men that are presently incarcerated in Georgia. The dedication to purpose and the tenacity used to entrap the obstinate S.O.S Troopers as and will also go down in the "Annals of Georgia History" as the "Legal Icing of

the Cake"!! I can imagine the mental discomfort for the Defenders of Terrorism both on the Bench and the Prosecution side, when Ms. Nancy Lord entered the courtroom?! I would have rather have Her as defense, than a whole Battalion of Turbaned Turks with scimitars hung at side.

The culmination of "The Good O Boys Roundup" would not have been complete without the resplendent articulation of one of "The Greatest Americans" who has walked the walk and can damn sure talk the talk. Loyalty, Unity, and Edification epitomizes J.J. Johnson and when he was finished with his message it was time to gather ones wits and look into the mirror, looking deeply into the soul, because the time of commitment, "totally" is not in the too far distant future. The escalation of major attacks against the "Patriots" will become more and more apparent unless with the Counter Tactics developed by the Gadsden Minutemen can turn or defuse as many situations as is financially and physically possible to do??!!

A special thanks to all who gave of themselves, (their stories) the fellowship of the campground will be a lasting influence in this O Hillbilly's thoughts and it is my prayer that this Republic continues to survive and be enhanced with the dedication, leadership, and influence of the Gadsden Minute Men and Their Families. God Bless their Units and God Bless America one more time.

There is one special person whose actions and worn out sole leather, making sure that everyone had a comfortable area.

"Mike Perrin" it will never cease to amaze me the physical endurance of this Militiaman and His dedication to service. Only one complaint though?? "The smell of frying bacon, eggs and taters" permeating the whole camp ground was the only bugle needed to rise and shine. Thanks Mike, your fellowship and Patriotic endeavor was exquisitely welcomed by everyone.

All Federal, State, and Local Agencies were invited but to my knowledge none attended. The area was well endowed with News Sources, and in amazement didn't make a nuisance of themselves. Whether the generation of good press will be visible in the future, I am sure this event will be closely monitored. The News Reporters including the Editor of Media By-Pass, Lawrence Meyers was at the gathering. I am sure that his articles will meet the muster of this event. A Times Staff Writer, Donna Maltbie also wrote an article that appeared in the Gadsden Times, Sunday, May 19th. Her article was very well written and unbiased and was example of excellent Journalistic ability that is not read very often and am extending appreciation from the Missouri Detachment to the Scribner and Editor of the Gadsden Times, and when time permits will produce it in its entirety from the key-board of this address.

Yours For Liberty
and Truth in Justice

Hillbilly Bill
